Subject: Fourth Quarter Monitoring Report for 1997 Groundwater Permit UGW230001

Dear Mr. Spor :

The Division of Water Quality is in receipt of your one-page report dated January 13, 1998 in compliance with the requirements under part I.E.1 of the Groundwater Discharge Permit No. UGW23001. This permit was issued to North Lily Mining Company in December 1997.

1. North Lily Mining Company must submit a Quality Assurance/Quality Control (QA/QC) plan for the proposed work by Blue Rock Excavation to cover the grade and compacted subore that will be ripped to normal depth of two feet to provide a subsoil for plant rooting. The plan must also cover the one foot of top soil that will be placed on top of the ripped subsurface and the seeding must conform to Division of Oil, Gas and Mining reclamation requirements.
2. Upon completion of the work described above an AS/Built report must be submitted certifying the work as complete. The plan must be certified by a registered Professional Engineer.
3. Propose a complete time line of the proposed activities by Compliance Technology of Salt Lake City by February 28, 1998 to include the beginning and conclusion of various phases of project.
4. North Lily Mining Company must submit a report to our office detailing plans for the short term disposition of excess water from the heap leach Land application of waste water cannot continue to occur based on previous approvals.

Failure by North Lily Mining Company to meet the above conditions and submission of required documents on time will result in delay of acceptance and necessary approvals by The Division of Water Quality. For further assistance in this matter, please contact Beth Wondimu at (801) 538-6084.

Sincerely,

Beth Wondimu
